

POSTCOM LETTER BOX SYSTEM

THE COMELIT RANGE does not stop at the letter boxes presented in this catalogue, but goes well beyond. The video door entry system catalogue n° 40 includes a large number of external and internal units with widely varying system solutions, able to fulfil all requirements. CCTV catalogue n° 45 contains all the products needed to construct closed circuit surveillance systems for civil and industrial use. Access control catalogue n° 47 makes it possible to construct control systems of entrances, ranging from the very simple to the very complex, with badge readers managed by a personal computer. Finally, Comtel telephone door entry system catalogue n° 49 includes telephone switchboards and telephone for carrying out telephone door entry systems suitable for both residential buildings and service sectors.

Postcom is a new series of modular built-up post boxes manufactured in compliance with DIN 32617 standards with DIN C4 size post insertion and retrieval.

Postcom is a solid, sturdy, indestructible product thanks to the technical solutions

adopted and the materials used: fronts made of anodised aluminium or painted, boxes made of galvanised sheet.

The number of letter boxes in the composition is practically up to the customer.

All the post boxes can be completed with the Logicom series modules to construct

an audio or video entrance panel. The Postcom post boxes are available in three versions:

- with vertical post box
- with horizontal post box
- with angled post box
(adjustable depth)

FLUSH-MOUNTED

EXTERNAL

ON STANDARD

For each of the first two versions, you can choose between:

- front post insertion and retrieval
- front post insertion and rear retrieval

Moreover, for each of these first two versions, there are different installation possibilities:

- flush-mounted
- external
- on standard

The third solution - the one with angled post box - is only available in the version with front post insertion and rear retrieval and for flush-mounted installation,

with adjustable depth to fit in with different wall depths (from 265 mm to 410 mm).

The above tables make it possible to find the article for the most frequent compositions. If a composition with provision for entrance panel is required, use table 1. Otherwise use table 2.

- Find the number of post boxes required

- Find the type of version required, selecting from:

- vertical post box (V=1st letter)
- horizontal post box (O=1st letter)
- angled post box (I=1st letter)
- front post insertion

and retrieval (A=2nd letter)

- front post insertion and rear retrieval (P=2nd letter)
- flush-mounted in wall (I=3rd letter)
- external (E=3rd letter)
- on standard (P=3rd letter)

In the versions with entrance panel, the compositions take into account housing the modules required to construct an audio or video entrance panel with the same or higher number of pushbuttons as the number of flats to be called.

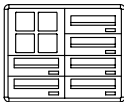

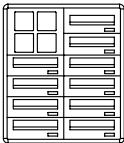

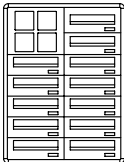

It must be underlined that the audio or video door entry system solutions are the same for the composition of the post boxes, since the audio and audio-video Logicom modules are the same size. The external versions or on standard are

fitted with rain shield. The external versions are always provided complete with wall suspension supports. The versions on standard are also complete with feet for fixing to the floor.

N.B. The h dimension for versions on standard indicates the distance from the top part of the post box in relation to the floor (standard included).

N.B. The standard is not shown in the drawings only because the drawings show the front view which is common to all versions.

Apart from the natural anodised aluminium version, there are many other different colours available to satisfy all aesthetic requirements.

To purchase a natural aluminium colour post box, it is not necessary to specify a code after the article. On the other hand, to purchase a post box in one of the colours shown below, a bar

and the code must be put after the article. For example, art. 3251/VAI/17 stands for a vertical box, front opening, flush-mounted, a green RAL 6002 post box with entrance panel.

COLOUR	DESCRIPTION	CODE
	Painted white RAL 9010	8
	Painted brown RAL 8017	9
	Painted green RAL 6005	10
	Anodised champagne	2
	Anodised gold	3
	Anodised bronze	4
	Anodised electric bronze	6
	Painted yellow RAL 1004	11
	Painted red RAL 3000	12

COLOUR	DESCRIPTION	CODE
	Painted grey RAL 7015	13
	Painted red RAL 3003	14
	Painted blue RAL 5003	15
	Painted grey RAL 7001	16
	Painted green RAL 6002	17
	Painted light blue RAL 5015	18
	Painted black RAL 9005	19
	Painted white RAL 9003	20

Versions for all needs:

Apart from the summarised versions proposed in the tables on pages 4-5, all the compositions are available, with the number of post boxes entirely up to the customer.

To obtain an offer, please do not hesitate to contact our technical sales office, giving the following details:

- number of post boxes required
- whether the composition has an entrance panel or not

- the type of post box required:

- vertical post box
- horizontal post box
- angled post box

- the type of post retrieval required

- front post insertion and retrieval
- front post insertion and rear retrieval

- the type of installation required:

- flush-mounted in wall
- external
- on standard
- the colour required

On request, compositions with post boxes of different sizes are available.

We shall be pleased to give you all the details regarding composition, dimensions and prices.

Services

Comelit Group is a company which has been operating on international markets for over thirty years, with a sales organisation in more than 70 countries world-wide.

Comelit Group has Distributors and Customers in Europe, Africa, the Americas, Asia and Oceania.

Europe is, however, the centre of our attention, with a branch operating in France (Lyons) and with consolidated and exclusive partners in all the other countries.

Comelit's objective is maximum product and service quality.

The results achieved in this direction are there to be seen.

In fact, Comelit has obtained the prestigious certification of the company Quality Assurance System from the CSQ certification body.

The IQ NET symbol conferred by the CSQ means that the Comelit Quality Assurance System complies with ISO9001 (EN 29001) standards which refer to the whole production cycle: design, development, production, testing, sales and after-sales service.

The New Approach Community Directives lay down that the products which come under their field of application must comply with the essential requirements contained therein in order to be put onto the market and put into service within the European Union. Compliance with the essential requirements is ensured by the manufacturer with the EC mark on the product and/or on the packing and/or on the instruction sheet.

Comelit products comply with the following directives:

- Dir. 89/336/EEC implemented with Legislative Decree n° 476 of 4/12/1992 and modified by Dir. 93/68/EEC for electromagnetic compatibility.
- Dir. 73/23/EEC implemented with Law n° 791 of 18/10/1977 and modified by directive 93/68/EEC for safety of Low Voltage electrical material.

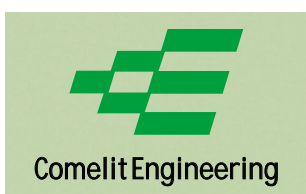

Comelit has a capillary network of technical service centres spread throughout the national territory able to rapidly assist the customer with any problems which may arise in an installation.

Comelit also has an internal technical assistance service, which is the point of reference for all types of information regarding both technical characteristics and methods for using and installing the products.

Training is one of Comelit's success factors. Hundreds of training courses are organised every year both at our headquarters and on our Customers' premises in Italy and throughout the world. These show installers and operators in the sector the new emerging technologies, performance, innovations and chances of opening up new markets made possible with our products.

The Comelit Engineering division has been operational for over 10 years within the Comelit Group and sees to providing the Customer with the best solution to all his requirements for audio door entry systems, video door entry systems, CCTV, access control and telephone systems with non-standard performance.

The Engineering division analyses all the special requests and provides "turnkey" solutions to fulfil the Customer's requirements in the best possible way.

You can phone us on 0346 - 72180 from 08.30 to 12.30 and from 14.00 to 18.00 Mondays to Fridays.

You can send us a fax to 0346 - 71436 every day of the week 24 hours a day.
