

ABLOY® MP420, MP422

High security DIN standard motor lock for narrow profile doors

Product description

High security locks MP420, MP422 are used in environments where convenience, higher security or high durability is needed. Two auxiliary locks with hook bolts offer even higher security level to demanding customers. The integrated monitoring contacts from the lock can be connected to the different systems.

Deadbolt and hook bolts are withdrawn inside the lockcase by motor and double action latch is released, when electrical control is on. Door is opened from outside by using door pull. When door closes, dead bolt and hook bolts are thrown out automatically, double action latch is blocked and the lock case is secured in four points.

Overview of Advantages

- Motorized bolt traction for push&pull and door automatics use
- Day/night mode
- Electric anti-tampering: if deadbolt is thrown out when door is not closed, it is withdrawn in automatically.
- Mechanical automatic locking system
- Non handed, left / right
- Burglary-resistant due to dead bolt with 20 mm throw and auxiliary hook bolts
- Exit function by inside handle
- Suitable for fire doors
- Mechanical override with cylinder
- Back-up function: If deadbolt and hook bolts are withdrawn by motor and then power is cut, deadbolt and hook bolts are thrown out immediately (closed door) or allowed to throw out (when door is closed).
- Monitoring functions
 - Door status
 - Handle down
 - Bolt deadlocked
 - Bolt in
 - Key cylinder used
 - Sabotage loop
